GUTMANN KF SERIES Fall Prevention System

The GUTMANN KF Series is an upper mounting model that highlights the simplicity and transparency of glass railings.

The KF Series provides design flexibility as it is suitable for all types of mounting, and has the strength, reliability, and durability for commercial and residential projects such as hotels, shopping malls, private villas, and homes.

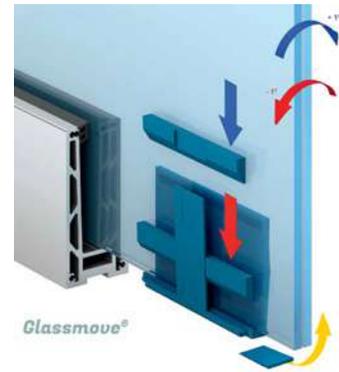

This railing system is available in a variety of anodized RAL colors and finishes.

SYSTEM DESCRIPTION

- > Compatible with Glassmove® parts
- > Accomodates glass thickness of $\frac{15}{32}$ " - $\frac{27}{32}$ "
- > Simplified and easy mounting installation with factory-drilled holes
- > Features extension pin holes
- > Features internal drainage holes
- > Available in anodized RAL color finishes
